Anticipating to better support the return of the sea

Gwenal HERVOUËT, délégué adjoint
délégation Bretagne - Conservatoire du littoral

april 2026

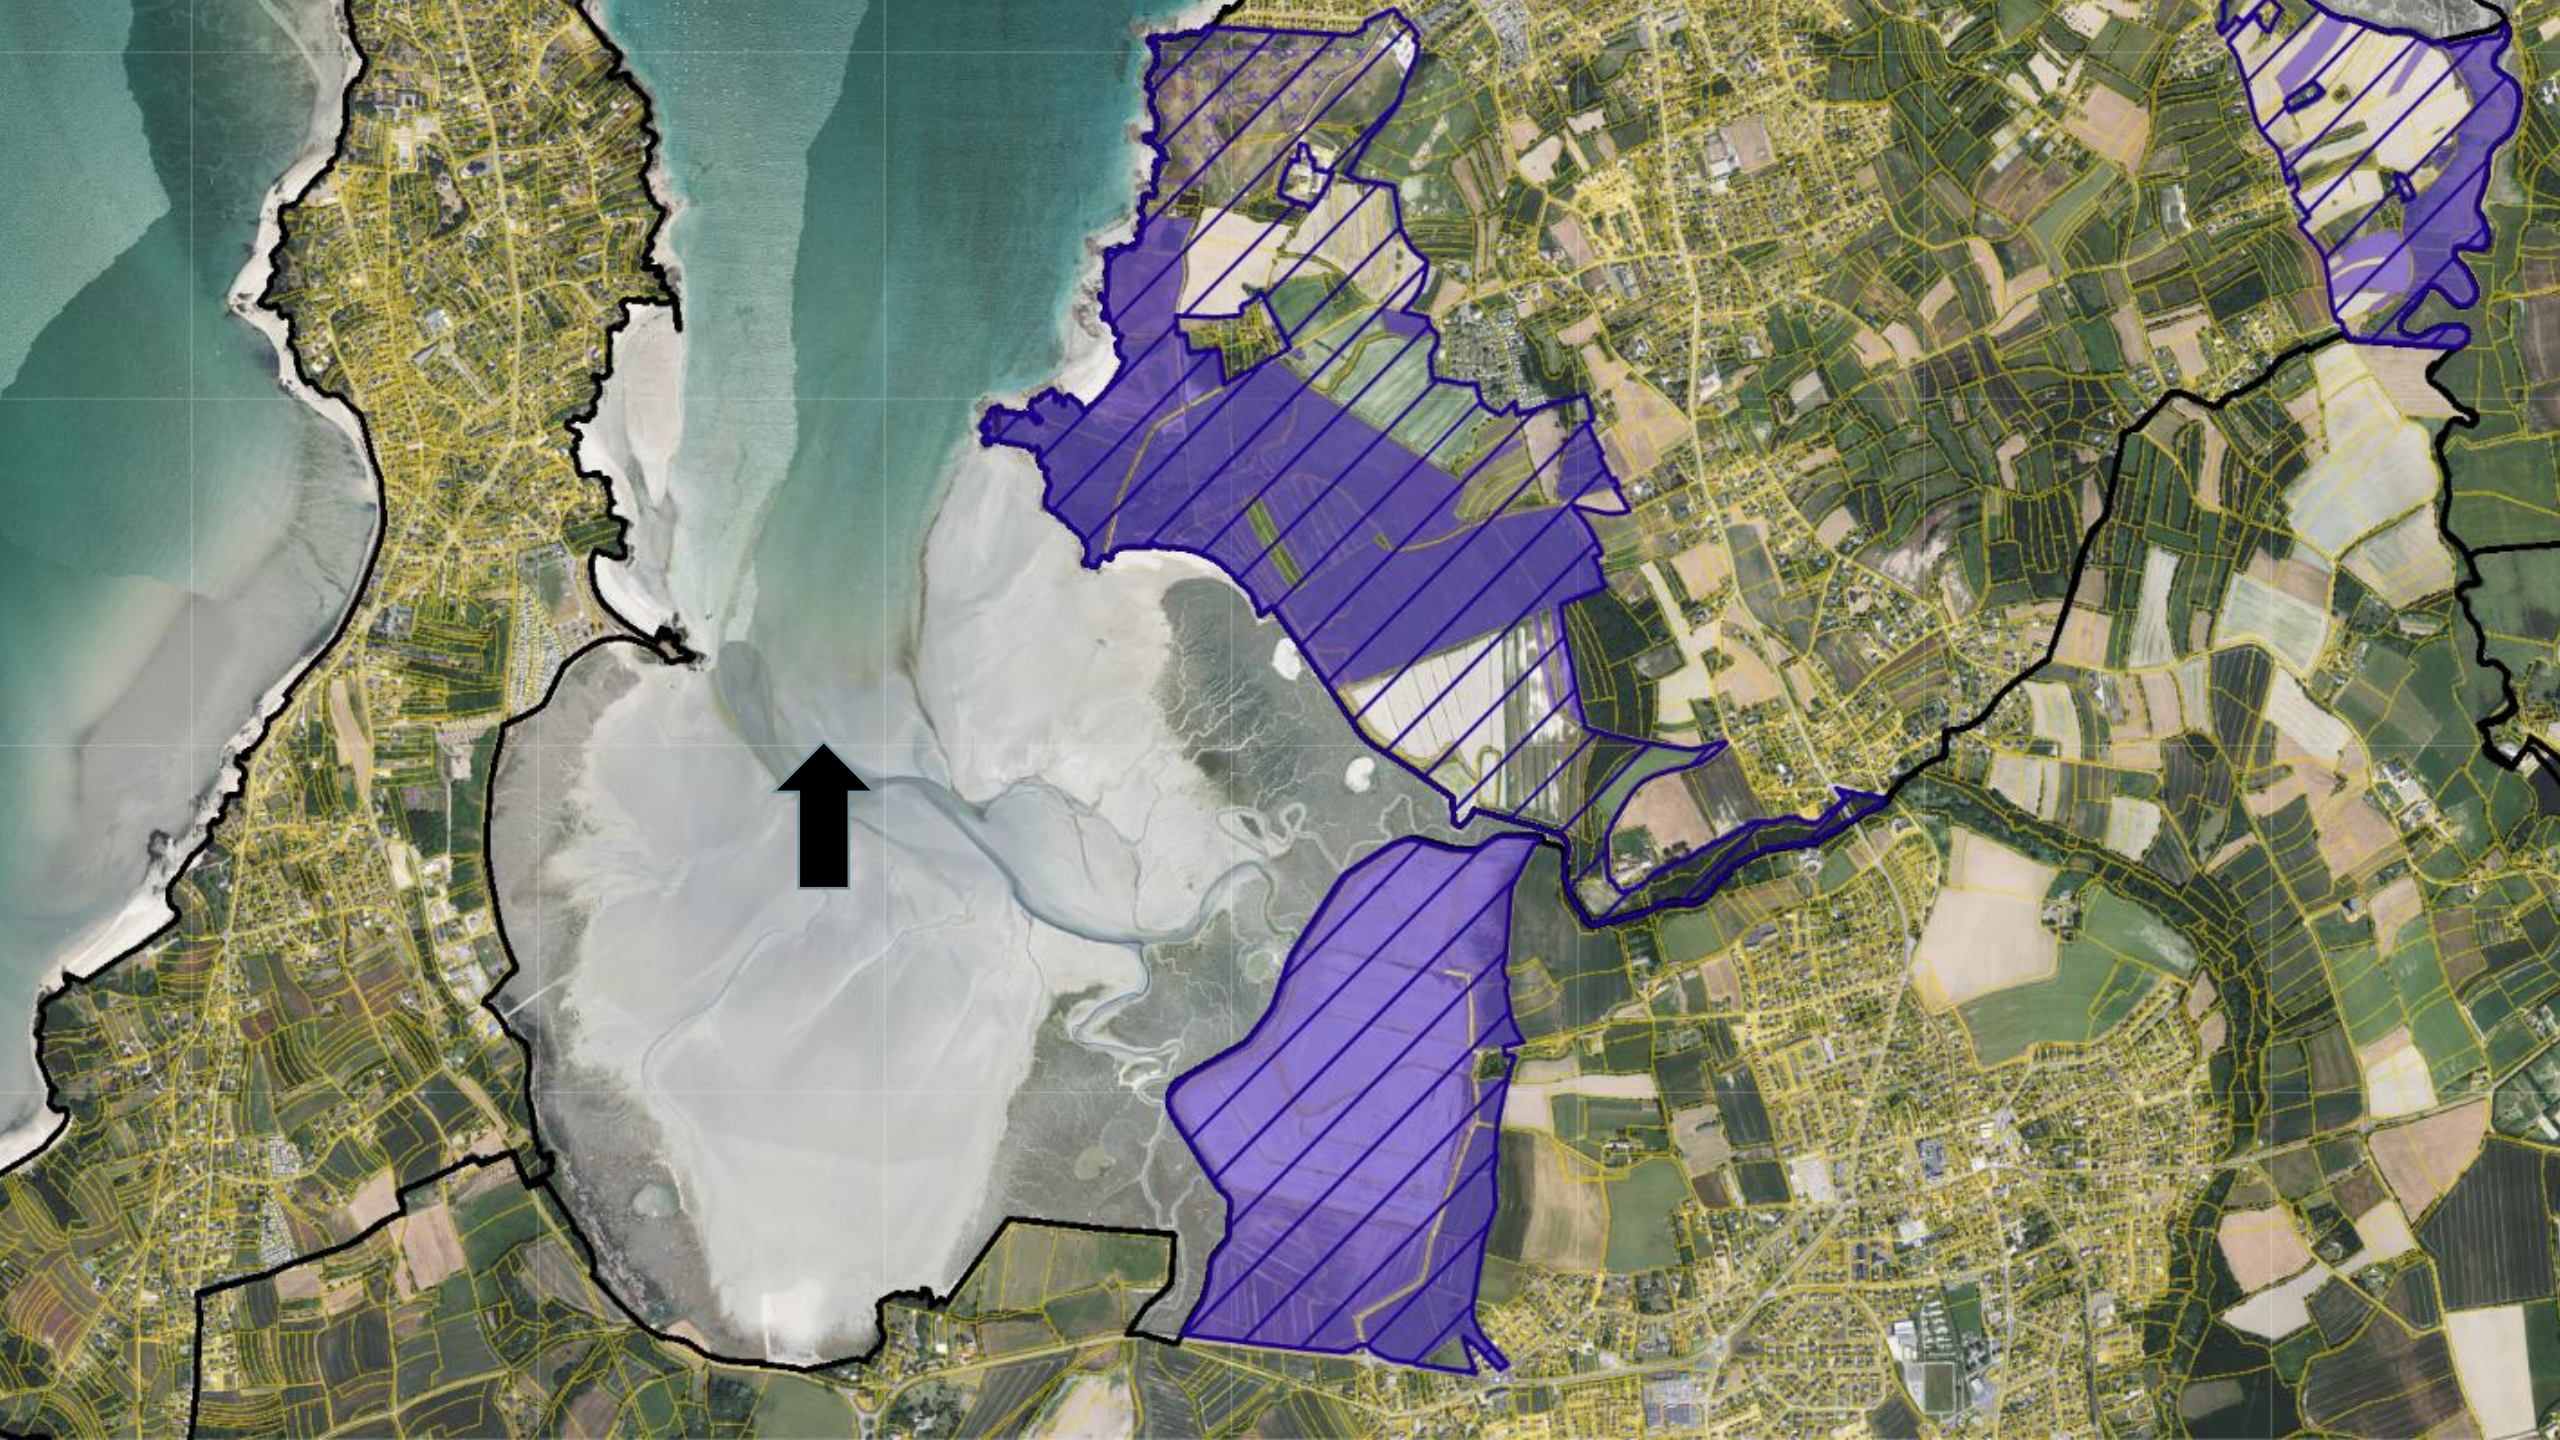

Co-funded by
the European Union

Maîtres mots de l'action du Conservatoire du littoral :

- Anticipation
- Adaptation
- Accompagnement
- Atténuer les effets du CC
- Reconnexion inéluctable
- Recomposition spatiale
- Résilience des usages
- Pédagogie
- Sobriété
- Foncier est une des clés du projet
- Acquisition de connaissances et de foncier

Key principles guiding the actions of the Conservatoire du littoral :

- Anticipation
- Adaptation
- Support (of local changes)
- Mitigation (of CC effects)
- Ineluctable reconnection
- Spatial recomposition / reorganization
- Resilience of uses / issues
- Education / Pedagogy
- Sobriety / Ressource efficiency
- Land ownership is one of the project's keys
- Acquisition of knowledge and land ownership

low tide

A wide-angle photograph of a coastal landscape during low tide. The foreground is dominated by a rocky and sandy shore. In the middle ground, a calm body of water reflects the overcast sky. The water is framed by two grassy dunes on either side, which are partially eroded, revealing light-colored soil. Several vertical wooden posts are driven into the ground and water, possibly remnants of a structure or fence. The background shows a flat expanse of land with a line of trees under a sky filled with soft, grey clouds.
